

keyword/theme	bill terms
allocative	-comprehensive, noninvasive, and evidence-based care -mental health support -rather than solely on physiological interventions -lack of insurance coverage -foster public and legislative understanding -remove any existing caps on damages -working towards better care and understanding -encourages all States to adopt similar resolutions -initiatives to support such individuals -highest ethical standards -limitation on gender related medical treatment -limitation on gender-affirming care -may not furnish or pay for any gender related medical treatment -with respect to a female individual -in female individuals -with respect to a male individual -in male individuals -does not include any medical treatment performed on an individual for the purpose of treating a disorder of sex development diagnosed by a physician -infection, injury, disease, or disorder caused or exacerbated by gender-related medical treatment
austerity	-prevent the use of funds -comprehensive noninvasive and evidence based care -lack of insurance coverage -fully disclose the risks -Department of Health and Human Services -revise guidelines -working towards better care and understanding -encourages all States to adopt similar resolutions -initiatives to support such individuals -highest ethical standards -rules for housing or transportation -limitation on gender related medical treatment -may not furnish or pay -such other medical treatments identified by the Director -diagnosed by a physician -determined through genetic or biochemical testing
construct	-gender ideology -Say No to Indoctrination -discomfort with their sex -mental health services

	-delayed realization of harm -discomfort due to their sex -are in the process of detransitioning -choice to detransition -gender affirming care -terms or ideas -gender identity -experienced gender -gender expression -gender roles -perception of such individual that the gender or sex of such individual is not female -perception of such individual that the gender or sex of such individual is not male -normal sex chromosome structure sex steroid hormone production or sex steroid hormone action -irresolvable ambiguous biological sex characteristics -both ovarian and testicular tissue
denigrating	-detransition awareness -later regret such interventions -seeking to reverse such interventions -suffer from a range of health complications -genital mutilation -sexual dysfunction -psychological distress -corrective or reparative treatments -regret -retribution -hateful rhetoric -delayed realization of harm -physical and psychological injuries -focus on mental health support rather than solely on physiological interventions -harmed by sex trait modification interventions -commends individuals who have detransitioned -infection injury disease or disorder caused by gender-related medical treatment
essentialist	-biological truth -sex trait modification interventions -reverse such interventions -irreversible physical changes -psychological distress -reality of their sex -corrective or reparative treatments

	-potential for regret -irreversible nature -physical and psychological injuries -attempt to alter the sex traits -same biological sex -biological determination -naturally has had will have or would have but for the development of a genetic anomaly or historical accident -produces transports and utilizes eggs for fertilization -produces transports and utilizes sperm for fertilization -natural differences between males and females -synonym for sex -normal sex chromosome structure sex steroid hormone production or sex steroid hormone action -ovarian and testicular tissue -biological sex characteristics -46 XX -virilization -46 XY -undervirilization -caused or exacerbated by gender-related medical treatment
family	-elementary and secondary education -infertility -fertility -fertilization -puberty blockers
identification	-gender ideology -ideology extremism -psychological distress -discomfort with their sex -mental health support -publicly announcing regret -choice to detransition -mental health services -struggling with discomfort with their sex -delayed realization of harm -gender identity -experienced gender -gender expression -gender roles -perception of such individual
institutionalization	-extend the statute of limitations -Department of Health and Human Services

	-housing -transportation -Prison -Bureau of Prisons -prisoner -imprisonment -other prisoners
medical	-health complications -genital mutilation -sexual dysfunction -infertility -osteoporosis -psychological distress -comprehensive noninvasive -evidence based care -sex trait modification interventions -corrective or reparative treatments -protect patients rights and health -all medical interventions are conducted according to the highest ethical standards -gender related medical treatment -surgical procedures -vaginectomy -Hysterectomy -Oophorectomy -reconstruction of the urethra -Metoidioplasty -Phalloplasty -Salpingo-oophorectomy -Scrotoplasty -implantation of erection or testicular prostheses -subcutaneous mastectomy -vocal cord surgery -pectoral implants -penile transplantation -exogenous doses of testosterone -GnRH agonists -synthetic drugs that suppress the production of estrogen and progesterone or delay or suppress pubertal development in female individuals -penectomy -orchiectomy -vaginoplasty -clitoroplasty -vulvoplasty -augmentation mammoplasty

	-facial feminization surgery -vocal cord surgery -chondrolaryngoplasty -gluteal augmentation -uterine transplantation -GnRH agonists -synthetic drugs that suppress the production of testosterone or delay or suppress pubertal development in male individuals -puberty blockers
protection	-defending women -retribution and hateful rhetoric -informed consent -fully disclose the risks of sex trait modification interventions -irreversible nature -better protect patients rights and health -delayed realization of harm -conducted according to the highest ethical standards -Rape Prevention -furnished to an individual
representation	-teach or advance concepts -Say No to Indoctrination -gender ideology extremism -Detransition Awareness -need for greater understanding and support -acknowledge the experiences of individuals who have detransitioned -courage in sharing their stories -foster public and legislation understanding -commends individuals who have detransitioned
transfemme	-defending women from gender ideology extremism -rape prevention -produces, transports, and utilizes sperm for fertilization -perception of such individual that the gender or sex of such individual is not male -penectomy -orchiectomy -vaginoplasty -clitoroplasty -vulvoplasty -augmentation mammoplasty -facial feminization surgery -vocal cord surgery -chondrolaryngoplasty -gluteal augmentation

	-uterine transplantation -exogenous doses of estrogen -GnRH agonists -synthetic drugs that suppress the production of testosterone or delay or suppress pubertal development in male individuals
transmasc	-defending women from gender ideology extremism -produces, transports, and utilizes eggs for fertilization -perception of such individual that the gender or sex of such individual is not female -vaginectomy -Hysterectomy -Oophorectomy -reconstruction of the urethra -Metoidioplasty -Phalloplasty -Salpingo-oophorectomy -Scrotoplasty -implantation of erection or testicular prostheses -subcutaneous mastectomy -vocal cord surgery -pectoral implants -penile transplantation -exogenous doses of testosterone -GnRH agonists -synthetic drugs that suppress the production of estrogen and progesterone or delay or suppress pubertal development in female individuals
transition	-sex trait modification -modification interventions -reverse such interventions -irreversible physical changes -a range of health complications -genital mutilation -physiological interventions -medical malpractice or negligence -physiologically invasive practices -physical and psychological injuries -attempt to alter the sex traits -living in the reality -medical interventions -delayed realization of harm -medical interventions -gender related medical treatment -gender affirming care -medical treatments provided for addressing the perception

	-surgical procedures -vaginectomy -Hysterectomy -Oophorectomy -reconstruction of the urethra -Metoidioplasty -Phalloplasty -Salpingo-oophorectomy -Scrotoplasty -implantation of erection or testicular prostheses -subcutaneous mastectomy -vocal cord surgery -pectoral implants -penile transplantation -exogenous doses of testosterone -GnRH agonists -synthetic drugs that suppress the production of estrogen and progesterone or delay or suppress pubertal development in female individuals -puberty blockers -other medical treatments -penectomy -orchiectomy -vaginoplasty -clitoroplasty -vulvoplasty -augmentation mammoplasty -facial feminization surgery -vocal cord surgery -chondrolaryngoplasty -gluteal augmentation -uterine transplantation -exogenous doses of estrogen -GnRH agonists -synthetic drugs that suppress the production of testosterone or delay or suppress pubertal development in male individuals -infection -injury -disease -disorder
